

press release

Phantom Electron Corporation awarded United States Patent.

Toronto, Canada – July 2003. Phantom's extensive knowledge and experience in the field of solar energy systems, coupled with its prior long track record in electronic security, has resulted in the company successfully achieving a patent for its "solar powered monitor", model PVA510.

This invention provides for high-reliability electronic security monitoring in areas where the electrical power supply is either not reliable or non-existent.

About Solera Sustainable Energies Company

Solera is empowering their clients to adopt cleaner, safer, sustainable energy technologies to assist in creating a better planet for our future generations. Additional information is available at www.soleraenergies.com
