

## press release

### **Phantom Electron Corporation announces the new incarnation of its solar energy business as Solera Sustainable Energies Company™.**

**Toronto, Canada – August 1, 2005.** In tune with growing public awareness of the important benefits of sustainable supplies of energy, and with steadily increasing marketplace acceptance, Phantom Electron has developed a strong brand presence through the unveiling of their new operating division, Solera Sustainable Energies Company™. With Solera's signature green flag, and their call-to-action green partner program called "Operation Solarization™", they are well defined in the marketplace and are clearly positioned on the leading edge of public awareness.

Solera will continue building on Phantom's notable successes in the application of solar technologies in both the commercial and residential sectors. Through skilled analysis of customers' energy requirements, Solera follows through with sustainable energy system design, integration, construction, and utility-grid interface.

With its existing technology patent as a foundation, Phantom Electron Corporation continues in the areas of custom electronic product design, development and manufacturing.

#### **About Solera Sustainable Energies Company**

Solera is empowering their clients to adopt cleaner, safer, sustainable energy technologies to assist in creating a better planet for our future generations. Additional information is available at [www.soleraenergies.com](http://www.soleraenergies.com)
